

Haider Ali

Full Stack Developer | AI-Assisted Development

Lahore, Pakistan | +92 323 8898327 | mail.haiderali94@gmail.com

Professional Summary

Full Stack Developer with experience building web and mobile products using React, React Native, Next.js, TypeScript, Node.js, and Ruby on Rails. Combines solid engineering fundamentals with AI-assisted development workflows, using tools like Claude, Cursor, and similar coding copilots to accelerate delivery, explore solutions, and improve iteration speed while maintaining production quality.

Core Skills

- JavaScript, TypeScript, React.js, React Native, Next.js, Node.js, Ruby on Rails
- Redux, REST APIs, Shopify, Stripe, Sentry, Push Notifications, BLE Integration
- Material UI, React Admin, Vue.js, Google Maps, PostgreSQL, Git
- UI/UX implementation, debugging, feature delivery, client communication, requirement gathering
- AI-assisted development: Claude, Cursor, coding copilots, rapid prototyping, debugging with LLM workflows

Professional Experience

Frontend / Full Stack Developer | Contractor

Aug 2024 – Present

- Develop and maintain web and mobile applications using React, React Native, JavaScript, TypeScript, Node.js, and modern frontend tooling.
- Build user-facing features, integrate APIs and third-party services, and improve reliability through monitoring and issue resolution with tools such as Sentry.
- Contribute to product delivery with a focus on maintainability, performance, and practical solutions for production environments.
- Use AI coding tools such as Claude, Cursor, and similar assistants to speed up prototyping, debugging, refactoring, and implementation while keeping code quality high.

Software Engineer | Jazzari

Mar 2023 – Jul 2024

- Collaborated with engineers to design, build, and improve software solutions for active client projects.
- Troubleshoot and resolved defects to improve product stability, usability, and client satisfaction.
- Contributed to frontend development, UI implementation, integrations, and solution design across multiple products.

Selected Projects

1stPage

React, Next.js, Node.js, Amazon SP-API, analytics pipelines, report ingestion

A seller intelligence platform for Amazon sellers and vendors that surfaces product analytics, performance signals, and operational insights by downloading and processing Amazon reports and SP-API data.

- Building analytics experiences that help sellers and vendors understand product performance, sales signals, and marketplace trends.
- Supporting integrations with Amazon SP-API and report ingestion workflows to transform raw Amazon data into dashboards and actionable insights.
- Contributing to product flows that make complex seller data easier to understand through clean UI and practical reporting.

Klaro

React Native, Redux, Ruby on Rails, Shopify, Push Notifications, BLE Integration

A mobile app for monitoring humidior atmospheric conditions and sending personalized alerts based on user preferences.

- Built UI/UX flows, API integrations, and third-party integrations across connected-device and e-commerce workflows.
- Contributed to backend test coverage, requirement gathering, client communication, and demo validation.

Samurai Dashboard

React, React Admin, Vue.js, Material UI, Google Maps

A retail distribution management platform used across delivery, inventory, distribution, and admin operations in the Gulf region.

- Resolved known issues, improved UI/UX, upgraded dependencies, and delivered feature enhancements.
- Supported Vue.js to React Admin migration and worked as a senior contributor on platform modernization.

Vstora

React.js, Next.js, TypeScript, Node.js, Push Notifications, Stripe

An all-in-one platform for creating and managing online businesses with inventory and operational workflows.

- Worked on customer-side and dashboard experiences, API integrations, UI implementation, and third-party services.

Agency Reviews

React, Next.js, Push Notifications

A platform that connects businesses with marketing and advertising agencies through reviews and ratings.

- Contributed to frontend development focused on usability, trust, and clear presentation of agency performance data.

London Filmed

React, TypeScript

A centralized platform for building, delivering, and managing event and media projects.

- Supported frontend implementation and user interface development.

Education

BSc in Electrical Engineering

University of Central Punjab | 2013 – 2017

Additional Strengths

- Comfortable working in fast-moving product environments where speed, iteration, and experimentation matter.
- Able to combine product understanding with AI-assisted workflows to move from idea to implementation quickly.
- Strong fit for startup and product teams looking for engineers who can ship, iterate, and adapt across frontend and backend work.
